Portfolio: <https://namjot.netlify.app/> | GitHub: <https://github.com/namjot7>

## Objective

Detail-oriented and motivated individual with a strong foundation in Java, MERN stack, and front-end technologies. Seeking to leverage my skills in data structures, RESTful APIs, and collaborative tools like GitHub and Jira to create dynamic and user-friendly applications.

## Projects

### E-Commerce Store | MERN Stack (MongoDB, Express.js, React.js, Node.js)

- Developed a responsive and user-friendly interface for the e-commerce platform using React.js and Tailwind CSS.
- Implemented an "Add to Cart" functionality with a working checkout system integrated with Stripe for secure payments.
- Saved order details to MongoDB, ensuring proper data storage and retrieval.
- Fetched product data from MongoDB using Node.js and displayed it dynamically in the UI.

### Spotify Clone | HTML, CSS and JavaScript

- Implemented playlists that adapt based on selected artists, providing a personalized listening experience with seamless song transitions.
- Used CSS and media queries to ensure a responsive layout across all devices, including mobile and desktop. Integrated a hamburger menu for easy navigation on smaller screens.
- Created a functional menu bar with play/pause, previous/next buttons, and a volume control slider, enabling intuitive control over playback with keyboard shortcuts.

## Skills

- **Languages:** Java, HTML, CSS, JavaScript
- **Frameworks and Libraries:** Tailwind CSS, React.js, Node.js
- **Databases:** MongoDB
- **Tools:** GitHub, Docker, Figma, Jira
- **Other:** Data Structures, RESTful APIs

## Certificates and Achievements

### Niagara College Toronto Hackathon

3<sup>rd</sup> position (Spring 2024)

## Education

### Diploma in Computer Programming

Niagara College Toronto (2023-2025)
